Summary

I've started my carrier with game development for have fun while working :) For a while, I realised that I'm having fun with coding all kind of stuff! I am eager to learn new technologies and interested in working with different areas.

Personally, I love to solve problems and puzzles. Since the beginning of my carrier, I've had a chance to worked with different technologies and solve them via a range of powerful tools and frameworks such as Php, Java, Javascript, Android, Mysql, NoSQL, Bootstrap, NodeJs ...

I also had some experience in server side. I have been using AWS technologies, docker with continuous integration and deployment strategies.

I've good knowledge of payment industry with 20 different payment option including payment gateways, PCI DSS, credit card transaction processing, settlements and chargebacks.

When I found a free time, I love to play with, Go, Meteor JS, Docker and my dear Raspberry PI.

Teaching and sharing the knowledge is the aim of my life.

Experience

Founder, Software Engineer & Consultant

Enigma Soft Limited

Oct 2016 - Present (3 years 7 months +)

Lead Software Architect

Growth Engineering Ltd

May 2018 - Present (2 years +)

- Design & Refactor of Legacy Application with Service-oriented API services
- Maintain and develop SAAS product
- Laravel & Lumen 5.x
- Vue.js 2.x
- Swagger
- Docker
- AWS
- Bitbucket Pipeline Implementations

System Administrator

StopMyCraving

Jan 2018 - Present (2 years 4 months +)

- Migration to AWS
- AWS Administration
- Magento Integration and Development

Senior Software Engineer

TechToPay

Oct 2016 - Aug 2017 (11 months)
